

CODA19 data - First 24h
Raw dataset - no imputation

2021-01-23 21:02:08

Data report overview

The dataset examined has the following dimensions:

Feature	Result
Number of observations	525
Number of variables	288

Checks performed

The following variable checks were performed, depending on the data type of each variable:

	character	factor	labelled	haven labelled	numeric	integer	logical	Date
Identify miscoded missing values	×	×	×	×	×	×		×
Identify prefixed and suffixed whitespace	×	×	×	×				
Identify levels with < 6 obs.	×	×	×	×				
Identify case issues	×	×	×	×				
Identify misclassified numeric or integer variables	×	×	×	×				
Identify outliers					×	×		×

Please note that all numerical values in the following have been rounded to 2 decimals.

Summary table

	Variable class	# unique values	Missing observations	Any problems?

Variable list

patient_site_uid

Feature	Result
Variable type	numeric
Number of missing obs.	0 (0 %)
Number of unique values	517
Median	5340868
1st and 3rd quartiles	770929; 5635577
Min. and max.	720; 5655546

female

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	0 (0 %)
Number of unique values	2
Mode	“0”
Reference category	0

male

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	0 (0 %)
Number of unique values	2
Mode	“1”
Reference category	0

patient_age

Feature	Result
Variable type	numeric
Number of missing obs.	0 (0 %)
Number of unique values	81
Median	74
1st and 3rd quartiles	59; 86
Min. and max.	21; 103

death

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	0 (0 %)
Number of unique values	2
Mode	"0"
Reference category	0

ami

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

chf

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

pvd

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

cevd

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

dementia

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

copd

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

rheumd

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

pud

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

mld

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".
-

diab

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

diabwc

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".
-

hp

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

rend

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

canc

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

msld

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

metacanc

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	integer
Number of missing obs.	371 (70.67 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

aids

- The variable only takes one (non-missing) value: "0". The variable contains 70.67 % missing observations.

score

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	371 (70.67 %)
Number of unique values	4
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "3".

5-alpha Reductase Inhibitors

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Acetaminophene

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"1"
Reference category	0

Adjuvants, Anesthesia

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Adrenergic alpha-1 Receptor Antagonists

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Adrenergic beta-3 Receptor Agonists

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Adrenergic beta-Antagonists

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Adrenergic Uptake Inhibitors

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Analgesics

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Analgesics, Opioid

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Androgens

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".
-

Anesthetics, Local

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".
-

Anti-Anxiety Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".
-

Anti-Arrhythmia Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Anti-Asthmatic Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Anti-Bacterial Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"1"
Reference category	0

Anti-Infective Agents, Local

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Anti-Inflammatory Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Anti-Inflammatory Agents, Non-Steroidal

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Anti-Ulcer Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Anticholesteremic Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Anticoagulants

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"1"
Reference category	0

Anticonvulsants

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antidepressive Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antidepressive Agents, Tricyclic

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antidiarrheals

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antiemetics

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antifibrinolytic Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".
-

Antifungal Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antihypertensive Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antimalarials

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antimetabolites

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antineoplastic Agents, Hormonal

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antiparkinson Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antipruritics

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antipsychotic Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Antithyroid Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antitubercular Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antitussive Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Antiviral Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".
-

Benzodiazepines

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Bicarbonate

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Bone Density Conservation Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Bronchodilator Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Calcium-Regulating Hormones and Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Carbonic Anhydrase Inhibitors

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Chelating Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Cholagogues and Choleretics

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Cholinesterase Inhibitors

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Contraceptive Agents, Hormonal

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Diuretics

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Factor Xa Inhibitors

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

Gastrointestinal Agents

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
Mode	"0"
Reference category	0

- Note that the following levels have at most five observations: "1".

Glucocorticoids

- Note that this variable is treated as a factor variable below, as it only takes a few unique values.

Feature	Result
Variable type	numeric
Number of missing obs.	160 (30.48 %)
Number of unique values	2
